### 2. Reason for the revision

We have positioned semiconductors, optical communications, life sciences, electric vehicle as “Essential Business Field”, that are expected to grow over the medium to long term, and will continue to invest in growth, development, and human capital in these areas. In the Semiconductor business, demand for server, automotive, and mobile applications, on which we are focusing, is expected to increase in the medium term, but in the short term, demand for semiconductors is expected to continue to adjust and the timing of recovery is expected to be slower than previously expected.

As a result, the consolidated sales forecast for the fiscal year ending March 31, 2024 has been revised downward from the previous forecast. Accordingly, operating income, ordinary income, and profit attributable to owners of parent are also expected to be lower than the previous forecast.
