Revised forecast (B)	37,800	4,600	5,200	3,400	385.19

### 2. Reason for the revision

In the Semiconductor business, demand for servers, automotive, and mobile applications, on which we are focusing, is expected to increase in the medium term, but in the short term, sales decreased due to continued market adjustments in servers and mobile applications. In Life Science business, despite plans to start mass production of new products in the future, sales decreased due to continued production adjustments by customers. In Digital Communication business, sales of optical fiber lens temporarily decreased due to component shortages in the optical transceiver supply chain. As a result, net sales, operating income, ordinary income, and profit attributable to owners of parent are expected to be lower than the previous forecast.
